## About Pronet

Pronet was established in 1992, and today is considered a strategic network security partner by numerous organizations of different sizes and footprint globally, in more than 40 countries across 5 continents. Our expertise, continuous innovation, learning and young talent, allows us to grow and serve many customers across industries.

## Cybersecurity Network Engineer T1

The role will be part of the Engineers team and reporting to the Network Engineers team leader. The ideal candidate will be responsible to provide support to users and customers in an efficient and accurate manner. Will maintain and troubleshoot revamped network infrastructure with the goal of maximizing network performance.

## What will you be doing

- Supporting large scale organizations across a global environment,
- Participate in major transformation projects (e.g., SD-WAN, Cloud Migration, Zero Trust),
- Provide technical support via Helpdesk Tools,
- Install, configure, maintain network infrastructure (switches).

## What will you bring

- Bachelor's Degree in Computer Science, Engineering, Telecoms or equivalent,
- CCNA certification,
- Cloud certifications (Azure, AWS, etc.) would be considered an asset,
- 1+ year of experience on routing and switching,
- Excellent verbal and written communication skills in Greek and English.

## What's in it for you

- A Certified career path,
- A continuous training & development plan, via coaching & mentoring,
- Competitive remuneration package,
- Being part of cutting-edge IT products that are making a global impact in the service industry,
- A work buddy will assist you with your on-boarding.
